## The arms

Pause Waiting for your loop's first call.

**blue ghost** = where the check commands each arm · **solid** = the pose your loop reported at its last call · **dashed** = each hand's commanded path · **orange dots** = where each call's pose put the hand. Drag to turn the view, scroll to zoom.

The arms could not be drawn: NetworkError when attempting to fetch resource.. They need three.js from cdn.jsdelivr.net.

## What the model sees

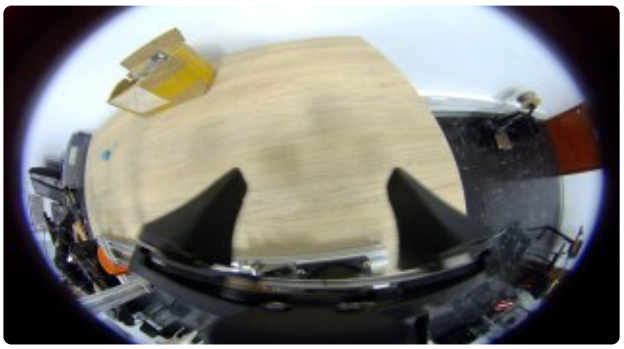

The page lost its program: the client or the view was closed.

1 2 3 4 5 6 7 8 9

### CAMERAS, LIVE AS SENT

Each camera plays the frames your loop sent, 5 a second as the model reads them: moving slower or faster than the robot means the loop hands the client its frames at the wrong rate.

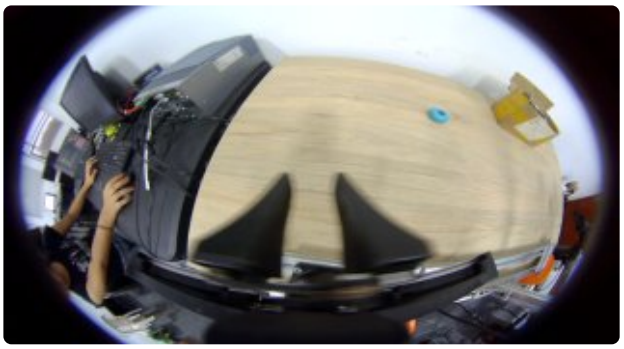

**video.wrist_l: 9 frame(s) a call, 320 x 176 px (aspect 1.82)**

**video.overhead: 9 frame(s) a call, 320 x 176 px (aspect 1.82)**

**video.wrist_r: 9 frame(s) a call, 320 x 176 px (aspect 1.82)**

## STATE AND PROMPT

| key | shape | value |
|---|---|---|
| prompt | [] | "put the blue object in the box" |
| state.left_arm | [6] | [0,0,0,0,0,0] |
| state.left_gripper | [1] | [0.5536] |
| state.left_grip | [1] | [0.5536] |
| state.left_eef_xyz | [3] | [0.1382,0.0235,0.0284] |
| state.left_eef_rot6 | [6] | [-0.7597,0.1737,-0.6267,0.1153,0.9844,0.1331] |
| state.right_arm | [6] | [0,0,0,0,0,0] |
| state.right_gripper | [1] | [0.0929] |
| state.right_grip | [1] | [0.0929] |
| state.right_eef_xyz | [3] | [0.1847,0.004,0.1413] |
| state.right_eef_rot6 | [6] | [-0.3481,0.0535,-0.9359,-0.0345,0.997,0.0698] |
| embodiment | [] | "other_embodiment" |
