Your arm's tool point

Upload your arm's URDF, confirm where the arm ends, and mark where your gripper's fingertips meet. Set tool center point saves the arm file that custom.ik in your station file points to.

Dream Labs | **Platform** / Setup wizard

Drop it here, or choose it. Next you'll click your gripper's tool point on a 3D view of the arm.

Choose .zip | Choose folder

piper_description.zip contains 6 URDFs. Choose the one for your arm:

- ◯ **piper_description/urdf/piper_description_old.urdf**
  10 links, 8 moving joints
- ◯ **piper_description/urdf/piper_description_v100_camera.urdf**
  10 links, 8 moving joints
- ◯ **piper_description/urdf/piper_no_gripper_description.urdf**
  8 links, 6 moving joints
- ◯ **piper_description/urdf/piper_description_v100.urdf**
  9 links, 8 moving joints
- ◯ **piper_description/urdf/piper_description.urdf**
  11 links, 8 moving joints

piper_description/urdf/piper_no_gripper_description_old.urdf
7 links, 6 moving joints
